

Problem: Getters/Setters Not Working with Lombok in Spring Boot (IntelliJ)

Solution:

1. Open IntelliJ IDEA
2. Go to **File → Settings**
3. Navigate to:
Build, Execution, Deployment → Compiler → Annotation Processors
4. Check **"Enable annotation processing"**
5. Under **"Annotation processor profile"**, make sure to select your project/module
6. Select first option
7. Apply and OK

This will enable Lombok to generate @Getter, @Setter, and other annotations correctly.
